How to Connect Apps

ELEGRP

DOWNLOAD THE APP

Scan the QR code or search [ELEGRP HOME](#) to download the App from the Apple App Store or Google Play.

BEFORE WE START

1. Ensure your mobile phone's Wi-Fi is turned on and is connected to a [2.4GHz](#) Wi-Fi network. If your WiFi router supports both the 2.4GHz and 5GHz dual bands, set their WiFi names (SSID) differently or turn off the 5GHz from the wireless page of the router (the entry address is usually provided on the label attached to the back of the router), then connect your phone to the 2.4GHz Wi-Fi network.
2. Ensure your mobile phone's Bluetooth is turned on.
3. Prepare the WiFi password of the WiFi network that your mobile phone is connected to.
4. Open the App and register an account to log in.
5. Tap the icon "Add Device" in the middle, or the add icon "+" on the top right of the homepage.

2.4GHz WiFi Only

Please make sure your WiFi network is 2.4GHz. The smart device is **NOT** compatible with 5GHz WiFi networks.

ADD DEVICE BY AUTO PAIRING

1. Power on the smart device and check if the indicator light is blinking - this indicates that the device is in pairing mode.
 - 2a. If the indicator light is blinking, the smart device will be automatically discovered.
 - 2b. If the indicator light is not blinking, press and hold the knob to enter the setting menu. Rotate the knob to select "Network Connection" and press to confirm. Follow the instructions on the screen until the indicator light starts blinking.
3. Add device from the discovered device list on the top.
4. Select the 2.4GHz WiFi network that your mobile phone is connected to. Enter the password for that network and wait a few seconds until the device is successfully added.

OR, ADD DEVICE MANUALLY

1. Power on the smart device and check if the indicator light is blinking - this indicates that the device is in pairing mode.
2. If the indicator light is not blinking, press and hold the knob to enter the setting menu. Rotate the knob to select "Network Connection" and press to confirm. Follow the instructions on the screen until the indicator light starts blinking.
3. Select the device type (Dimmer Switch DRS10 or Dimmer Switch DRS30) and then follow the instructions in the App to finish the pairing.
4. Select the 2.4GHz WiFi network that your mobile phone is connected to. Enter the password for that network and wait a few seconds until the device is successfully added.

Create ELEGRP HOME Account First

Due to the limitation of the system, you will need ELEGRP HOME account to connect with Amazon Alexa App or Google Home/Google Assistant App.

CONNECT TO AMAZON ALEXA

1. Open the Amazon Alexa App and tap "Skills and Games" from the "More" menu.
2. Search the Skill name "ELEGRP HOME" .
3. Tap "Enable to use" .
4. If necessary, type in your ELEGRP HOME login information from the App account and grant authorization in the App.
5. Then you can control your devices in Amazon Alexa App or using voice through your Amazon Alexa devices.

CONNECT TO GOOGLE

- 1a. If you're using Google Home App, open the App and tap the add icon "+" on the top left. Then find "Work with Google" from the list in "Set up device" .
- 1b. If you're using Google Assistant App, open the App and tap your account name on the top right and then tap "Devices" . Find "Link a device" from the list in "Add a device" .
2. Search the name "ELEGRP HOME" .
3. Tap "Continue" .
4. If necessary, type in your ELEGRP HOME login information from the App account and grant authorization in the App.
5. Then you can control your devices in Google Home/Google Assistant App or using voice through your Google Home devices.
